DOMEL AUTOMOTIVE

BLDC MOTOR CAPABILITIES

- Electric drive
- Rotor and Stator
- Electric motor components

- Customized design
- State-of-the-art materials
- High integration of semi parts
- Reliable products
- Innovative protection solutions

From customer specification to industrialization.

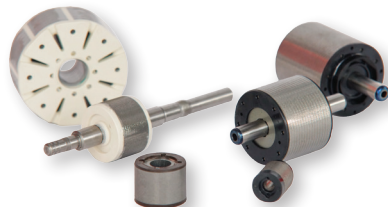

ELECTRICAL STEEL STAMPING / STACKING

Stamping and stacking of electrical steel laminations using high speed presses.
Interlocking of thin laminations up to 0,20 mm.

OVERMOULDING ROTOR WITH MAGNETS AND SHAFT

Magnet fixation and protection in one step.
Higher rotor rigidity and additional possibility
of different outer forms of plastic.

INSULATION OVERMOULDING STATOR

For straight and skewed poles with different
height compensation. Single mould for
insulation of front, back and in slot insulation.

TOOLING

In – house design and production.
Tools for stamping, stacking,
overmoulding thermoset injection moulding.
