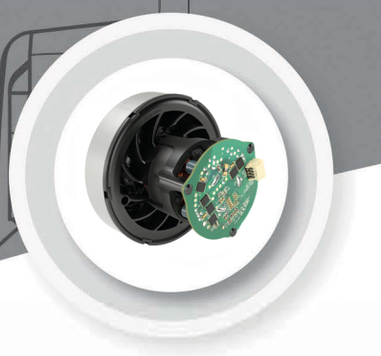
DOMEL IS READY FOR THE NEW ECO STANDARD — AND BEYOND



Scan to discover
our eco-efficient motor solutions

Next-Generation Eco-Efficient Motor Solutions

Domel sets a new benchmark for environmentally responsible electric motors — combining high performance with environmental impact.

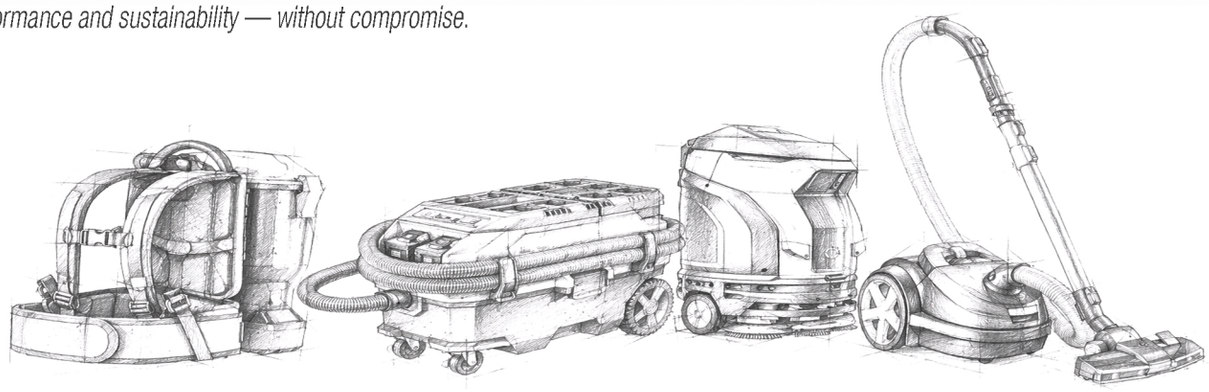
Engineered for the Future

- Optimised efficiency
- Reduced energy consumption
- Lower carbon footprint
- Extended service life

👉 *Performance and sustainability — without compromise.*

Why Domel?

- 80 years of expertise in electric motor development
- Trusted global supplier with proven reliability
- High-performance solutions
- Support in achieving top energy efficiency standards (up to Energy Class A)

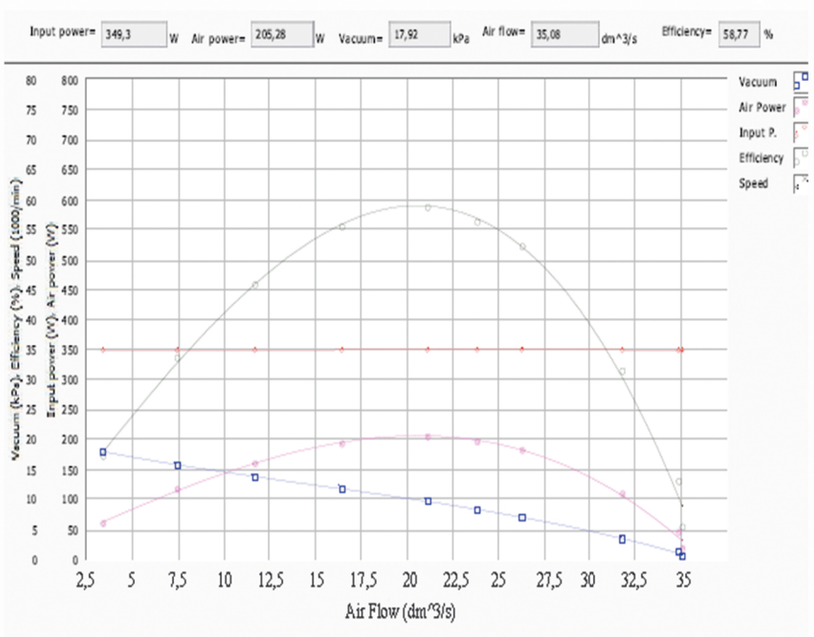


What Does Our Eco Approach Mean?

Our eco approach is designed to meet the highest sustainability standards:

- High motor efficiency
- Optimised weight
- Low noise levels
- Extended service life
- Reduced CO_2 footprint
- Repairability
- Material recyclability

👉 Designed for long-term environmental and operational efficiency.



Sustainability in motion.
Ready for the next generation of eco standards.
